From design to development- fabrication to facade.

Melton Classics is committed to manufacturing the highest quality polyurethane millwork solutions for the building industry. We can manufacture literally any millwork or moulding pattern you desire. If you can dream it and design it, Melton Classics can make it for you.

Proudly Made in the
USA

Our Architectural Urethane millwork gives you the look and feel of wood millwork, but it far exceeds the performance of wood without any aesthetic compromise. Each millwork or moulding pattern is made to exacting dimensions by our staff of Master patternmakers. All our Melton Classics millwork products have an unmatched crispness of detail, and provide you with the true authentic look of wood millwork, but with low maintenance and superior performance.

Melton Classics Architectural Urethane is shipped factory primed with a high quality exterior latex paint. You also should know that Melton Classics architectural Urethane millwork products are made from water-based environmentally friendly materials.

Melton Classics has over 20 years of experience in the polyurethane millwork industry. We have the knowledge, experience, and expertise to make the millwork you want at an amazingly affordable price.

**ALL Melton Classics Architectural Urethane Millwork
Products are made in the USA.**

MANUFACTURED IN AMERICA

Melton Classics is committed to manufacturing the highest quality urethane millwork products.

Residential or Commercial, Melton Classics can replicate historic millwork made by the finest craftsmen to exacting detail.

Architects, builders, and homeowners strive to make their project unique. Melton Classics can make your new millwork ideas come to life.

CUSTOM DESIGNS, STYLES, & SIZES AT YOUR REQUEST

At Melton Classics, Inc., our Master Patternmakers can work from drawings, pictures, prints, or original pieces to provide you with a long lasting quality product. We would love to quote your custom project. Whether you are in need of a historic reproduction or you have your own design, allow us to bring your ideas and designs to life.

LIMITED WARRANTY

Melton Classics, Inc. hereby warrants its parts upon the following conditions against defects in materials and workmanship for a period of one year after delivery to Purchaser when used and installed under normal conditions. The foregoing warranty is in lieu of and excludes all other warranties not expressly set forth herein, whether expressed or implied by operation of law or otherwise including but not limited to any implied warranties or merchantability or fitness. Failure to follow Melton Classics's storage and installation instructions will void this limited warranty.

Buyer and installer must inspect each piece before installation. Installer and Buyer waive all defects, which could have been discovered by reasonable inspection prior to installation. This includes all misalignment, misfitted, parts, dimensional discrepancies and the like. In the event that any claim is made under this warranty, an authorized representative of Melton Classics shall have the right to inspect the parts and if, in his or her sole discretion, said representative determines the parts defective, Melton Classics will repair, replace, or refund its distributor the amount paid to Melton Classics for said defective parts. The sole obligation of Melton Classics under this warranty is to REPAIR, REPLACE, OR REFUND as described above.

Melton Classics shall have no liability to any person, firm, or corporation whatsoever for incidental or consequential damages such as but not limited to, labor, finishing cost, parts damaged by freight carriers, freight charges, installation, lost profits, lost sales or like. No purchaser may take any deduction, credit, or set-off against any amount owed Melton Classics or make any charge-back without express written consent of Melton Classics.

BALUSTRADE SYSTEM Installation Instructions

Melton Classics, INC.

BALUSTRADE/RAILING SYSTEM INSTALLATION INSTRUCTIONS

*Melton Classics, Inc. is a manufacturer of quality molded urethane. Our product is designed to withstand moisture, insects, and the outside elements. Our millwork has a painted finish that is chemically bonded during the molding process. This base coat will not peel or crack. An additional primer is applied prior to shipping. We do recommend top-coat painting mouldings with an exterior paint.

- Most states use the **4" BALL** to meet building code regulations. This rule is that a 4" ball cannot pass through the widest opening between balusters.

- Structural integrity is the responsibility of the installer.
- Custom items cannot be returned or cancelled once the production has already begun.
- Proper **safety procedures** are to be used when installing, sanding, or sawing our product, such as wearing safety glasses and a dust mask. Urethane dust can be irritating and should not be inhaled.
- Using Melton Classics, Inc. products does not contribute to depleting our valuable forests.
- Melton Classics, Inc. products should be stored in the temperature conditions in which they will be installed.
- Melton Classics, Inc. **warrants** all of its' products against defects in materials and workmanship for a period of **1 year** from the date of purchase, when used and installed under recommended conditions.
- Melton Classics, Inc. offers **balusters with extensions** on top and bottom for stair application.

BALUSTRADE SYSTEM Installation Instructions

Newel Post Installation Kit

(Order 1 kit per Newel Post)

Kit Number*	Newel Posts
MNPK 300-4	Fits all 4" newel posts
MNPK 300-6	Fits all 5 1/2" newel posts
MNPK 300-8	Fits all 8" newel posts
MNPK 300-9	Fits all 9" newel posts
MNPK 300-10	Fits all 10" newel posts
MNPK 300-12	Fits all 12" newel posts

*Note: Newel Kits are available for either wood or concrete application. To specify please add -W for wood or -C for concrete to the end of the kit number.
Ex. (MNPK 300-4-W or MNPK 302-8-C)

**MADE IN THE
USA**

Wood Kit

1. One floor flange
2. Four 3/8" x 2" lag bolts
3. One 1/2" x 48" threaded rod
4. One "C" channel
5. One 1/2" flat washer
6. One 1/2" lock washer
7. One 1/2" Nut

Concrete Kit

1. One floor flange
2. Four 3/8" x 2 1/4" concrete wedge bolts
3. One 1/2" x 48" threaded rod
4. One "C" channel
5. One 1/2" flat washer
6. One 1/2" lock washer
7. One 1/2" nut

Railing Installation Kit

(Order 1 kit per Top & Bottom Rail Section.)

Kit Number	Fits These Rails
MRK 180	MTR 180, MTR 232-MBR 233, MTR 212-MBR 213
MRK 200	MTR 182-MBR 183 MTR 200-MBR 201, MTR 202-MBR 203 MTR 210-MBR 211 MTR 760-MBR 761
MRK 204	MTR 204-MBR 205, MTR 218, MTR 220

MRK 208	MTR 208-MBR 209, MTR 216

Railing Kit

1. Two pre-drilled aluminum angle brackets. (Top Rail)
2. Two pre-drilled aluminum angle brackets w/ 5/16" tapped hole. (Bottom Rail)
3. Eight #14 x 2" self tapping screws.
4. Four 1/4" x 2" Panhead bolts.
4. Two 5/16" x 1 1/2" hex head bolts.

STAIR RAIL KITS

Simply add an **MRK-(S)**
MRKS 200

*Note: Must provide rise & run.

BALUSTRADE SYSTEM Installation Instructions

IMPORTANT

STEP 1

Mark the layout line and center points of each porch post and newel post prior to installation. This is very important to ensure the accurate length for installing the top and bottom rails. Use 12' as the maximum railing length.

STEP 2

WOOD DECKING INSTALLATION

1. Install blocking under where each newel's floor flange will be located.
2. Locate and center each floor flange and secure using 3/8" lag bolts.
3. Thread the 1/2" x 48" rod into the welded nut on the floor flange and tighten using vise grips.

CONCRETE INSTALLATION

1. Mark anchor hole in floor flange. Drill a 3/8" hole 1 1/4" deep into the cured concrete.
2. Insert anchor and using a punch, set the anchor pin.

STEP 3

1. Measure and combine the heights of the bottom rail and baluster (Distance X). This is the distance between the bottom of the angle brackets used to fasten railings to posts.
2. Mark the location and height of the bottom rail from the concrete or wood surface (Distance B).
3. Using the measurement of the rail and baluster (Distance X), locate the bottom of the top bracket.
4. Mark the top and bottom bracket on the newel post.
5. Mortise the newel post so that the face of the angle brackets are inset and are flush with the surface of the newel post.
6. Drill holes and secure angle brackets with #14 x 2 self tapping screws.

STEP 4

1. Rout the top of the newel post to accept the C-channel.
2. If trim collars are being used, slide them on the bottom before placing the newel post over the floor flange.
3. Put the C-channel in place and secure loosely with the nut and lock washer.

BALUSTRADE SYSTEM Installation Instructions

STEP 5

1. Determine your rail length.
2. Cut top and bottom rail to proper size.
3. Mortise the bottom of each rail to accept the 2 1/2" aluminum angle.
4. Drill a single 5/16" hole in the bottom rail that corresponds with the single 5/16" threaded hole on the bottom 2 1/2" x 2 1/2" aluminum angle.
5. Mark a center line on rails. Mark the position of each baluster then drill a hole to accept the PVC pipe that extends out either end of the baluster. Standard hole saws work well for drilling these holes.
6. Apply a bead of urethane adhesive to the bottom of each baluster and place the balusters in the holes of the bottom rail. Apply a bead of urethane adhesive to the tops of each baluster and set the top rail on the balusters. Clamp together using strap clamps, making sure baluster blocks are square to the bottom and top rail. A straight strip of plywood wedged between the baluster blocks and strap clamps helps to align baluster blocks straight and parallel to the top and bottom rail.
7. Allow the adhesive to set for 12 hours.

STEP 6

1. Remove the strap clamps from completed railing section.
2. Apply a small bead of urethane adhesive to the aluminum angles that are fastened to the newel posts, and to the ends of each top and bottom rail.
3. Leave the newel posts loose so you can slide the glued up rail section between them without smearing glue on exposed parts of the newel post.
4. Fit the mortises on the undersides of the rail onto the 2 1/2" x 2 1/2" aluminum angle that is mounted to the newel post.
5. Predrill 1/8" holes through the holes in the top aluminum plates into the PVC pipe. Install 2 #14 x 2" pan head self tapping screws.
6. Thread the 5/16" x 1 1/4" bolt through the bottom plate and into the 5/16" hole you drilled in the underside of the bottom rail. (*Note: This 5/16" threaded bolt does not provide downforce. It is intended to keep the rail from moving laterally. Typical installations do not have enough room between the decking and the underside of the bottom rail for the use of screws.)
7. After securing rail section to newel posts tighten up the nut on the newel post, securing it to the deck.
8. Apply a small bead of urethane adhesive to the top of the newel post and glue the newel cap in place. Small brad nails will keep the cap aligned until the glue sets.

BALUSTRADE SYSTEM Installation Instructions

STEP 7

1. After the glue dries, clean off excess with a sharp putty knife. Caulk any cracks with a good quality latex paintable caulk.
2. Melton Classics, Inc. recommends applying a finish coat of latex paint to your railing system..

**MADE IN THE
USA**

BALUSTRADE SYSTEM Installation Instructions

Over the Newel Post Installation Kit

(Order 1 kit per Newel Post)

Wood Kit

1. One floor flange
2. Four 3/8" x 2" lag bolts
3. One 1/2" x 48" threaded rod
4. One "C" channel
5. One 1/2" flat washer
6. One 1/2" lock washer
7. One 1/2" Nut
8. One Top Rail H-Bracket

Concrete Kit

1. One floor flange
2. Four 3/8" x 2-1/4" concrete wedge bolts
3. One 1/2" x 48" threaded rod
4. One "C" channel
5. One 1/2" flat washer
6. One 1/2" lock washer
7. One 1/2" nut
8. One Top Rail H-Bracket

Kit Number*	Newel Posts	Fits
MNPK 304-8	In-Line Kit	8" Newel
MCNPK 304-8	Corner Kit	8" Newel
MNPK 304-12	In-Line Kit	12" Newel
MCNPK 304-12	Corner Kit	12" newel

*Note: Specify -W for wood application or -C for concrete application

Ex. (MNPK 304-8-W or MNPK 304-8-C)

The only change for the OVER THE NEWEL INSTALLATION is the H-bracket is through bolted on top of the C-Channel of the Newel Kit. This also eliminates the need for standard top rail brackets. The top rail is then secured with screws through the pre-drilled hole in the H-Bracket.

Over the Newel Railing Installation Kit

(Order 1 kit per Rail Section)

Kit Number	Fits These Rails
MRK 206-B	MTR 206, MBR 207, MTR 214, MBR 215
MRK 208-B	MTR 208, MBR 209, MTR 216

* STAIR APPLICATION - Standard Stair Rail Kit. & Newel Kit. Over the Newel Kits are not made to work on stairs.

* Comes with Bottom Brackets only.

Over the Newel Railing Kit

1. Two pre-drilled aluminum angle brackets w/ 5/16" tapped hole (Bottom Rail)
2. Eight #14 x 2" self tapping screws
3. Four 1/4" x 2" Panhead bolts
4. Two 5/16" x 1 1/2" hex head bolts

RAIL KITS

Part No. MRK 208 ; MRK 216

STAIR RAIL KITS

Part No. MRKS 208 / MRKS 216

**Customer must specify rise and run of stairs
1 KIT PER TOP & BOTTOM RAIL SECTION

BALUSTRADE SYSTEMS

Order Calculation & Information Sheet

Calculate Number of Balusters

Divide the rail length between your newel posts by the (S) dimension under each baluster in the catalogue.

S = Spacing on Center

Stair Rail Kits - Provide Rise & Run of Steps

Radius Rails Information

Provide Radius, or Width & Projection of the Porch or from Springline.

RADIUS _____ or (Width _____", Projection _____")

DOOR SURROUNDS SELECTION GUIDE

Door Surrounds Gallery

DOOR SURROUNDS SELECTION GUIDE

1. Determine the distance between the inside edge of your pilasters as they will be installed on the door jamb. (See Diagram A & B)
2. Locate the Crosshead & Crosshead/Pediment Combination Selection Chart . Under the Pilaster Widths heading you will see the different widths pilasters available for your door surrounds. Each width column lists different door unit dimensions. Locate the dimension that fits or is the closest to the distance between your pilasters. Typically you will go up to the next larger size. This will usually result in the crosshead overhanging the pilasters edge slightly which is not uncommon. Note There may be more than one pilaster width to work with your door system.
3. To select a crosshead and pediment that will work with your chosen pilasters width and door unit dimension, Move to the right across the page under the Crosshead and Crosshead/Pediment Selection Chart. Note: The names correlate to a particular style Crosshead or Crosshead/Pediment Combination as identified at the top of the page.
4. Locate the Pilaster Selection Chart and find the chosen width pilaster required for your application. Select the style you desire and the height needed to fit your application. NOTE: Many doors have a stoop 6" below the bottom of the door and typically the pilasters bottom will stand on the stoop. Pilaster heights can be adjusted by cutting the bottom plinth. Some pilasters are available with a loose plinth. See the Pilaster Selection Chart for details.

• Vented soffit moulding comes with insect screen.

*Other vented profiles available. Call for quote.

MOULDINGS

All urethane moldings will expand and contract with temperature. It is recommended to install the moldings as tightly as possible to minimize expansion and contraction.

- **STORAGE** - If the product is stored in a trailer, remove and allow the material to adjust to the temperature in which it is being installed. Allow the moulding to adapt for at least 24 hours prior to installation.
- **CUTTING** – Urethane Millwork can be cut using the same basic methods and tools as wood.
- **JOINTS** – Butt joints on straight runs and mitered joints for corners.
- **ADHESIVE** – PL-PREMIUM urethane adhesive should be used in all joints and can help secure moulding to the wall and ceiling when applied to the back of the product.
- **BLOCKING** - Install molding on a solid backing or studs 16" on center or less. Larger molding will require additional blocking.
- **FASTENERS** –Galvanized screws are the best fastener or coated ring-shank nails with a head.

Installation Procedure:

- Measure for the length of molding needed to fit your application and add 1/8" to the measurement and mark your molding. **Ex.** If your application measures 10', mark and cut your molding at 10'-1/8". If your application requires 16' add 3/16" to your measurement or approximately 1/16 inch for every 5 feet of molding.
- Fasten one side of the molding in place. Bow the center of the piece out away from the wall to allow the other end of the molding to fit in place and fasten. Push the center of the molding against the wall and secure with recommended fasteners and Urethane adhesive.
- **PAINT PREP** – Melton Classics Architectural Urethane Mouldings and Millwork is factory primed with a high emulsion exterior paint. Fill fastener holes with painter's putty. Any joint alignment required can be performed with sand paper. Use 2-part plastic wood filler to recreate smooth surface. Follow manufactures recommendations for cure time before spot priming.
- **PAINT** - Use a 100% acrylic latex paint with a Light Reflective Value (LRV) of 55 or higher. • For paint colors equivalent to an LRV of 54 or lower, paints specifically designed for such applications must be used.
