BALUSTRADE SYSTEM Installation Instructions

Melton Classics, INC.

BALUSTRADE/RAILING SYSTEM INSTALLATION INSTRUCTIONS

*Melton Classics, Inc. is a manufacturer of quality molded urethane. Our product is designed to withstand moisture, insects, and the outside elements. Our millwork has a painted finish that is chemically bonded during the molding process. This base coat will not peel or crack. An additional primer is applied prior to shipping. We do recommend top-coat painting mouldings with an exterior paint.

- Most states use the **4" BALL** to meet building code regulations. This rule is that a 4" ball cannot pass through the widest opening between balusters.

- Structural integrity is the responsibility of the installer.
- Custom items cannot be returned or cancelled once the production has already begun.
- All products that have been approved by Melton Classics Architectural Millwork, Inc. for return must be shipped prepaid and a 25% **restocking fee** will be assessed. Parts that have been installed, painted, or modified in any way may not be returned.
- Proper **safety procedures** are to be used when installing, sanding, or sawing our product, such as wearing safety glasses and a dust mask. Urethane dust can be irritating and should not be inhaled.
- Using Melton Classics, Inc. products does not contribute to depleting our valuable forests.
- Melton Classics, Inc. products should be stored in the temperature conditions in which they will be installed.
- Melton Classics, Inc. **warrants** all of its' products against defects in materials and workmanship for a period of **1 year** from the date of purchase, when used and installed under recommended conditions.
- Melton Classics, Inc. offers **balusters with extensions** on top and bottom for stair application.

BALUSTRADE SYSTEM Installation Instructions

Newel Post Installation Kit

(Order 1 kit per Newel Post)

Kit Number*	Newel Posts
MNPK 300-4	Fits all 4" newel posts
MNPK 300-6	Fits all 5 1/2" newel posts
MNPK 300-8	Fits all 8" newel posts
MNPK 300-9	Fits all 9" newel posts
MNPK 300-10	Fits all 10" newel posts
MNPK 300-12	Fits all 12" newel posts

*Note: Newel Kits are available for either wood or concrete application. To specify please add -W for wood or -C for concrete to the end of the kit number.
Ex. (MNPK 300-4-W or MNPK 302-8-C)

**MADE IN THE
USA**

Wood Kit

1. One floor flange
2. Four 3/8" x 2" lag bolts
3. One 1/2" x 48" threaded rod
4. One "C" channel
5. One 1/2" flat washer
6. One 1/2" lock washer
7. One 1/2" Nut

Concrete Kit

1. One floor flange
2. Four 3/8" x 2 1/4" concrete wedge bolts
3. One 1/2" x 48" threaded rod
4. One "C" channel
5. One 1/2" flat washer
6. One 1/2" lock washer
7. One 1/2" nut

Railing Installation Kit

(Order 1 kit per Top & Bottom Rail Section.)

MRK 208	MTR 208-MBR 209, MTR 216

Railing Kit

1. Two pre-drilled aluminum angle brackets. (Top Rail)
2. Two pre-drilled aluminum angle brackets w/ 5/16" tapped hole. (Bottom Rail)
3. Eight #14 x 2" self tapping screws.
4. Four 1/4" x 2" Panhead bolts.
4. Two 5/16" x 1 1/2" hex head bolts.

STAIR RAIL KITS

Simply add an **MRK-(S)**
MRKS 200

*Note: Must provide rise & run.

BALUSTRADE SYSTEM Installation Instructions

IMPORTANT

STEP 1

Mark the layout line and center points of each porch post and newel post prior to installation. This is very important to ensure the accurate length for installing the top and bottom rails. Use 12' as the maximum railing length.

STEP 2

WOOD DECKING INSTALLATION

1. Install blocking under where each newel's floor flange will be located.
2. Locate and center each floor flange and secure using 3/8" lag bolts.
3. Thread the 1/2" x 48" rod into the welded nut on the floor flange and tighten using vise grips.

CONCRETE INSTALLATION

1. Mark anchor hole in floor flange. Drill a 3/8" hole 1 1/4" deep into the cured concrete.
2. Insert anchor and using a punch, set the anchor pin.

STEP 3

1. Measure and combine the heights of the bottom rail and baluster (Distance X). This is the distance between the bottom of the angle brackets used to fasten railings to posts.
2. Mark the location and height of the bottom rail from the concrete or wood surface (Distance B).
3. Using the measurement of the rail and baluster (Distance X), locate the bottom of the top bracket.
4. Mark the top and bottom bracket on the newel post.
5. Mortise the newel post so that the face of the angle brackets are inset and are flush with the surface of the newel post.
6. Drill holes and secure angle brackets with #14 x 2 self tapping screws.

STEP 4

1. Rout the top of the newel post to accept the C-channel.
2. If trim collars are being used, slide them on the bottom before placing the newel post over the floor flange.
3. Put the C-channel in place and secure loosely with the nut and lock washer.

BALUSTRADE SYSTEM Installation Instructions

STEP 5

1. Determine your rail length.
2. Cut top and bottom rail to proper size.
3. Mortise the bottom of each rail to accept the 2 1/2" aluminum angle.
4. Drill a single 5/16" hole in the bottom rail that corresponds with the single 5/16" threaded hole on the bottom 2 1/2" x 2 1/2" aluminum angle.
5. Mark a center line on rails. Mark the position of each baluster then drill a hole to accept the PVC pipe that extends out either end of the baluster. Standard hole saws work well for drilling these holes.
6. Apply a bead of urethane adhesive to the bottom of each baluster and place the balusters in the holes of the bottom rail. Apply a bead of urethane adhesive to the tops of each baluster and set the top rail on the balusters. Clamp together using strap clamps, making sure baluster blocks are square to the bottom and top rail. A straight strip of plywood wedged between the baluster blocks and strap clamps helps to align baluster blocks straight and parallel to the top and bottom rail.
7. Allow the adhesive to set for 12 hours.

STEP 6

1. Remove the strap clamps from completed railing section.
2. Apply a small bead of urethane adhesive to the aluminum angles that are fastened to the newel posts, and to the ends of each top and bottom rail.
3. Leave the newel posts loose so you can slide the glued up rail section between them without smearing glue on exposed parts of the newel post.
4. Fit the mortises on the undersides of the rail onto the 2 1/2" x 2 1/2" aluminum angle that is mounted to the newel post.
5. Predrill 1/8" holes through the holes in the top aluminum plates into the PVC pipe. Install 2 #14 x 2" pan head self tapping screws.
6. Thread the 5/16" x 1 1/4" bolt through the bottom plate and into the 5/16" hole you drilled in the underside of the bottom rail. (*Note: This 5/16" threaded bolt does not provide downforce. It is intended to keep the rail from moving laterally. Typical installations do not have enough room between the decking and the underside of the bottom rail for the use of screws.)
7. After securing rail section to newel posts tighten up the nut on the newel post, securing it to the deck.
8. Apply a small bead of urethane adhesive to the top of the newel post and glue the newel cap in place. Small brad nails will keep the cap aligned until the glue sets.

BALUSTRADE SYSTEM Installation Instructions

STEP 7

1. After the glue dries, clean off excess with a sharp putty knife. Caulk any cracks with a good quality latex paintable caulk.
2. Melton Classics, Inc. recommends applying a finish coat of latex paint to your railing system..

7. One 1/2" nut
8. One Top Rail H-Bracket

Kit Number*	Newel Posts	Fits
MNPK 304-8	In-Line Kit	8" Newel
MCNPK 304-8	Corner Kit	8" Newel
MNPK 304-12	In-Line Kit	12" Newel
MCNPK 304-12	Corner Kit	12" newel

*Note: Specify -W for wood application or -C for concrete application

Ex. (MNPK 304-8-W or MNPK 304-8-C)

The only change for the OVER THE NEWEL INSTALLATION is the H-bracket is through bolted on top of the C-Channel of the Newel Kit. This also eliminates the need for standard top rail brackets. The top rail is then secured with screws through the pre-drilled hole in the H-Bracket.

Over the Newel Railing Installation Kit

(Order 1 kit per Rail Section)

Kit Number	Fits These Rails
MRK 206-B	MTR 206, MBR 207, MTR 214, MBR 215
